

Innovative Staff Communication System

Transform Onsite Communications with Connect

CONNECT Education is the next evolution of our market leading on site paging solution, **Connect Education** is designed to seamlessly integrate with today's modern IT infrastructure.

The **Connect** system allows you to have true ownership of the calls to your staff and reporting, allowing you to easily communicate to any staff wherever they are located on site.

With the Connect groups & preset messages each user can customise their own desktop with frequently used messages and commonly messaged groups which are instantly available.

Connect has options to monitor inputs from push buttons used for Lockdown alerts which can be strategically located throughout the facility enabling critical alerts to be sent to staff.

With versatile options **Connect Education** offers customisation to suit any budget, and what works best for your staff.

Key System Features

Some of the core features are:

- Completely Web-Based, users can access their account from any network workstation PC.
- At its core is our revolutionary EMS (**Event Management System**) which allows for complete control of the entire event workflows.
- Full site coverage with our powerful network based transmitters we can guarantee no black spots.
- Lockdown Alert option, touch screen lockdown alert and critical messages via Touch Screen Push Button.
- Event logging enables reports to be generated showing messages sent by date and time.
- Discrete robust alphanumeric pagers with belt clip holder.
- Customisable frequently used message directory.
- Add Important groups such as first aid staff, fire marshals or leadership teams for bulk messaging.

Lockdown Alert Option

Wall mounted touch buttons for critical alerts can be mounted anywhere throughout the facility
