

## BTG Server Call 16 Systems

### Transform your kitchen to front of house communication with BTG Server Call 16

The BTG Server Call 16 waiter paging system provides instant communication between the kitchen and your wait staff at the press of a button.

No more shouting for service a single button press calls the waiter via a discrete staff pager with a simple vibration that can easily be felt but remains invisible to diners.

With a BTG Server Call 16 system food will be delivered at its best whilst its still hot and fresh.

BTG Server Call 16 has user options for automatic recall alerting staff up to three times with the option to automatically call a manager if the calls are unanswered. Alternatively the system can be set via user settings for simple one press one call.

An all page button allows all staff to be called simultaneously back to the kitchen when required to give messages such as the special has finished.

With a BTG Server Call 16 system your staff will spend more time with diners but always know when order is ready for service.
