TableLocator™

Restaurant Table Tracking System

It's Like Sat Nav for Your Wait Staff

TableLocator displays the status and table location for all food orders

No more searching the restaurant for customers! No more table numbers! TableLocator™ efficiently tracks where your diners are seated and updates the kitchen in seconds.

TableLocator™ will transform the way your restaurant or bar operates. Servers know where every order is seated, if a customer moves tables the order moves with them & the food order screen is updated immediately.

1. Customers order food and are handed a TableLocator™
2. The customer selects a table and places the TableLocator™ on the table
3. TableLocator™ updates the screen with the table number
4. Once the food order is prepared the wait staff check the screen for the table to serve

TableLocator Highlights

- **At a Glance Table Tracking**
  TableLocator™ will update the display the moment a customer selects a table.
- **Deliver Food Fast**
